

DETECTOR-54 SOLAR SECURITY LIGHT WITH MOTION SENSOR

The Detector-54 Solar Security Light is powered by a solar module which can be positioned up to 10 feet away from the light itself. The replaceable and rechargeable sealed battery pack can illuminate your light up to 50 times on a single charge.

This Security Light gives you peace of mind knowing that your residence is securely lit at night without you incurring high electricity charges.

Unit: WGGJ03
Category: Security Light with Motion Sensor
Rating: Ip44
Voltage: 6V
Applications: Building security for commercial, industrial and residential use.

- 6V 4Ah Lead Acid rechargeable battery
- 54 Super Bright LED's give a high powered beam illuminating approximately 100m²
- 9V, 110mA Solar Panel, built in circuit to prevent overcharge
- Passive infra red motion detector recognizes movement on a 110 degree horizontal sight
- Automatic Day/Night Switch
- Adjustable 'on-time' from 1 to 4 minutes, sensitivity and ambient light setting
- Durable ABS plastic construction, easy to install, hardware included
- Completely solar powered, no electrical wiring needed
- IP44 rated
- Charge time 4 hours, operation time 8 hours, 50 on/off cycles per full charge
